

REImagine Mobile Devices in the Classroom

Lightspeed Systems

Mobile Devices Are Just the Beginning

Extend the classroom and expand your possibilities with a complete solution that's focused solely on education needs. With dynamic content filtering, simplified device management and the collaborative VLE, My Big Campus, Lightspeed Systems Mobile Learning Essentials turns mobile devices into transformative tools.

Start the day with the push of a button

Get information into students' hands instantly. From pushing apps and web clips to assigning schoolwork with push notifications, students have easy access to the day's lessons, whether they're in class or at home sick.

Have a discussion

As lessons progress, inspire thought provoking discussions with online collaboration, individualised groups, and an environment that makes learning fun.

I've had some questions about the best way to create your solar system diorama for your end of the semester project. I want you all to use your imaginations and be creative, but it's always good to help each other with ideas. Who wants to share how they're going to create their solar system diorama? Let's collaborate!

Is there a size limit on how big the diorama can be? I'm going to make mine out of styrofoam balls and wire hangers.

Zed Bot 1 hour ago | [Actions](#)

I'm going to use puff balls in different colors and sizes and hang them in a shoe box.

Find exactly what you are looking for.

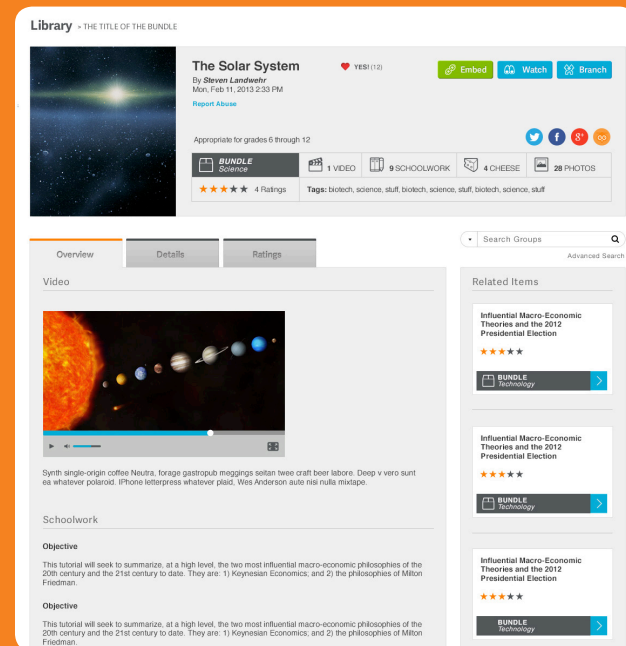

Teachers

With the My Big Campus library, gain immediate access to valuable and appropriate content that is subject, year, and standards specific.

Research curated content.

Students

Encourage valuable research skills and have students search for their own content, or direct them to previously curated resources in a powerful and multi-media rich environment.

Once the lesson is complete, assign a test or quiz and have students show what they've learned—all without leaving My Big Campus.

Take the test

Assess the test

After students have completed the test, teachers can access scores instantly, and use robust assessment tools to track progress toward standard mastery and help tailor teaching methods to students' specific needs.

The top of the slide features a white background with numerous light blue stars of varying sizes scattered across it. Three stars are a darker, vibrant blue: one in the upper left, one in the upper right, and one in the center.

The possibilities are endless

Education is no longer just pencils and paper inside a brick and mortar classroom. It's using search engines, YouTube videos and online encyclopedias to understand the world. Technology has revolutionised our classrooms, our thought processes and even our students. It's time to reimagine the way we learn.

Let's engage students in meaningful projects and create collaborative communities where every student has a voice. Let's extend learning beyond classroom walls and school bells in a way that turns daily activities into lessons with parents actively involved. Let's inspire students to be proactive and excited about their education. Let's listen to how and what they're motivated to learn.

The bottom of the slide features a white background with numerous light blue stars of varying sizes scattered across it. Three stars are a darker, vibrant blue: one in the lower left, one in the lower center, and one in the lower right.

REImagine

Mobile devices in the classroom are valuable tools that create opportunities for more engaged learning. Lightspeed Systems Mobile Learning Essentials helps you effectively implement those tools to realise the opportunity for revolutionised education.

- A web filter that's about access
- An VLE that's about collaboration
- An MDM that's made for schools
- A complete Mobile Learning Essentials solution that makes it easy for schools to transform learning with mobile devices

With over 10 million students protected and engaged, Lightspeed Systems is committed to helping schools do amazing things by reimagining dynamic learning environments that are safe, mobile, and collaborative.
